Amirhossein Bagheri

amirhossein.bagheri.001@gmail.com · ahbagheri01.github.io · github.com/ahbagheri01 · Google Scholar

Education

Politecnico di Milano *Milan, Italy*
M.Sc. in Computer Science & Engineering *Sept. 2025 – Present*
– GPA: 29.20/30

Sharif University of Technology *Tehran, Iran*
B.Sc. in Computer Engineering *Sept. 2019 – July 2024*
– GPA: 19.58/20 (29.37/30); major GPA: 19.82/20 (29.73/30).
– Thesis: Enhancing lesion detection in breast mammograms through semi-supervised learning.

Research Interests

ML Theory & Robust Statistics for Safe and Robust AI · Reinforcement Learning & Sequential Decision-Making

Publications

f-FUM: Federated Unlearning via Min-Max and f-Divergence
Amirhossein Bagheri*, Radmehr Karimian*, Meghdad Kurmanji, Nicholas D. Lane, and Gholamali Aminian. *Under review; arXiv preprint arXiv:2602.06187*, 2026.

Enhanced Classifier-Guided Diffusion through Information-Theoretic Regularization
Seyed Alireza Javid, **Amirhossein Bagheri**, and Nuria Gonzalez-Prelcic. *IEEE International Symposium on Information Theory (ISIT)*, 2026.

Enhancing Diffusion Model Guidance through Calibration and Regularization
Seyed Alireza Javid, **Amirhossein Bagheri**, and Nuria Gonzalez-Prelcic. *NeurIPS Workshop on Structured Probabilistic Inference & Generative Modeling (SPIGM)*, 2025.

f-SCRUB: Unbounded Machine Unlearning via f-Divergences
Amirhossein Bagheri*, Radmehr Karimian*, and Gholamali Aminian. *ICLR Workshop on Navigating and Addressing Data Problems for Foundation Models (DATA-FM)*, 2025.

Semi-Supervised Learning under Self-Training via f-Divergence
Gholamali Aminian, **Amirhossein Bagheri***, Radmehr Karimian*, Mahyar JafariNodeh*, and Mohammad Hossein Yassaee. *The Second Tiny Papers Track at ICLR*, 2024.

Robust Semi-Supervised Learning via f-Divergence and α-Rényi Divergence
Gholamali Aminian, **Amirhossein Bagheri***, Mahyar JafariNodeh*, Radmehr Karimian*, and Mohammad Hossein Yassaee. *IEEE International Symposium on Information Theory (ISIT)*, 2024.

** denotes equal contribution.*

Research Experience

The Alan Turing Institute *Remote*
f-FUM: Federated Unlearning via Min-Max and f-Divergence; f-SCRUB *Nov. 2024 – May 2026*
– Developed f-FUM, a federated unlearning method using min-max optimization with f-divergence objectives.
– Evaluated client- and data-level deletion, needing up to 8× fewer synchronization phases than full federated retraining.
– Extended the SCRUB unlearning framework with f-divergence objectives (f-SCRUB); compared combinations of f-divergences.

Sharif University of Technology & The Alan Turing Institute *Tehran, Iran / Remote*
Robust Semi-Supervised Learning via f-Divergence *Sept. 2023 – May 2024*
– Proposed risk functions and regularizers based on f-divergences and α-Rényi divergence for semi-supervised self-training.
– Provided an upper bound on ideal performance for metric distance.
– Analyzed the risk functions and regularizers across different scenarios and datasets under noisy pseudo-labels.

Sharif University of Technology *Tehran, Iran*
B.Sc. Thesis *Jan. 2023 – May 2024; Defense: June 2024*
– Developed a weakly supervised labeling pipeline to generate segmentation masks for unlabeled mammogram data.
– Introduced and evaluated a pipeline for using unlabeled data in lesion detection in mammograms.

Work Experience

RSO Company *Tehran, Iran*
Machine Learning Engineer *Jul. 2024 – Oct. 2025*
– Deployed LLMs in production, worked on large-scale graph data, and developed MLOps pipelines for training, deployment, and monitoring.

CommaMed Startup, Science and Technology Park, Sharif University of Technology
Lung X-ray Segmentation Research Intern *June 2022 – Sept. 2022*
– Worked on ResUNet-based lung segmentation and semi-supervised methods for robustness to distribution shift.

Highlighted Projects

AIRIC, Politecnico di Milano *Milan, Italy*
Foundation Models for Time Series [Presentation] *Apr. 2026 – Aug. 2026*
- Benchmarked foundation models against classical statistical methods for time-series forecasting.
- Studied and compared the architectures of different foundation models for time series.

Politecnico di Milano *Milan, Italy*
Online Learning in Serverless Computing *Dec. 2025 – May 2026*
- Event-driven DAG simulation for NSGD-based serverless autoscaling with shared resource constraints and end-to-end workflow metrics.

Activities

Polimi Data Scientists, Data Science Club *Politecnico di Milano*
Event Team Member *2025 – Present*
- Part of the student-led data science association at Politecnico di Milano.

Achievements

MAECI Scholarship, Ministry of Foreign Affairs of the Italian Government Sept. 2025
Ranked 5th, Among 190 undergraduate students, Sharif University of Technology Sept. 2024
Ranked 31st, Nationwide Universities Entrance Exam (Konkur), among 160,000 participants June 2019

Teaching Experience

Sharif University of Technology *Tehran, Iran*
Teaching Assistant and Project Supervisor *Spring 2022 – Fall 2023*
- Differential Privacy (graduate): project supervisor, Fall 2023.
- Signals and Systems: head TA, Fall 2022 and Fall 2023.
- Probability and Statistics: designed and graded assignments, Fall 2022 and Fall 2023.
- Linear Algebra: project supervisor; designed and graded assignments, Spring 2022 and Fall 2023.
- Artificial Intelligence and Design of Algorithms: designed and graded assignments; held TA sessions, Spring/Fall 2022.

Technical Skills

Programming	Python, C++, C, Matlab, PostgreSQL, LaTeX, R, Java
Frameworks	LangChain, TGI, vLLM, Llama.cpp, SQLAlchemy, Neo4j, Git
DevOps & OS	Linux, Docker
Machine Learning	NumPy, Pandas, Scikit-learn, Matplotlib, MLflow, Seaborn
Deep Learning	PyTorch, Keras, TensorFlow
Languages	Persian (native), English (proficient; TOEFL 105: R28, L28, S27, W21).

Selected Coursework

Polimi (M.Sc.)	Reinforcement Learning (PhD-level, 28/30), Bayesian Statistics (29/30)
Sharif (grad.)	Machine Learning (19.3/20), High-Dimensional Probability (18.6/20), Information-Theoretic Methods in Learning and Statistics (18.4/20), Stochastic Processes (19/20)
Sharif (B.Sc.)	Engineering Probability and Statistics (20/20), Linear Algebra (20/20), Discrete Structures (19.6/20), Artificial Intelligence (20/20), Design of Algorithms (20/20), Advanced Information Retrieval (20/20), Introduction to Bioinformatics (20/20)

Related Course Projects

Bayesian Statistics (Fall 2025): Bayesian modeling of transconjugation efficacy under chemical stressors.
High Dimensional Analysis (Spring 2023): Theoretical analysis of adversarial learning.
Information Theory, Statistics, Learning (Fall 2022): Application of tilted losses and α-Rényi divergence in robust learning.
Machine Learning (Fall 2021): Dimension reduction, SVMs, transfer learning, and recommendation systems.
Artificial Intelligence (Spring 2021): A*, genetic algorithms, CSP, minimax, Bayesian inference, Gibbs sampling, DNN, HMM, and RL.
Advanced Information Retrieval (Spring 2022): Classification, clustering, ranking, and advanced search of 2k articles with BERT.
Introduction to Bioinformatics (Fall 2022): Microarray data analysis.
